In the second year of production for [Kona](#)'s WO, the 2015 model dropped 5-pounds from last year's bike through spec'ing the tubeless ready Sun Mulefüt rims, Vee Snowshoe 4.5" tires and lighter components. Wider spacing front (135) and rear (170) allows for bigger rubber, sliding drop-outs offer a single-speed option and the low stand-over gives a roomy cockpit. Photos by [Bob Allen](#)
